On Thursday 17th of January there was a small fire in Business Avenue Sharah-e-faisal, housing offices of some of leading companies of Pakistan. That accident could have been devastating if it was not stopped in time. The cause given by media and organizations was again same short circuiting or some problem with generator of a company.

If we think for a moment what will happen to my business if something like this happens to the building we have offices in. Can I sustain a prolonged power failure, can I afford to go out of business for few days or week. Will my clients continue to do business with a company which can not guarantee continuity of operations. Especially in current scenario and situation of Pakistan we need to give right signals to our clients regarding our continuity and safety.

As in National IT Park disaster, all offices were closed for at least one week. Some organizations with vision moved to contingency sites and restored their operations within 8 hours; others either closed their operations or had to wait for few days before becoming partially operational again.

Elate IT is proud to be only company in Pakistan at that time of disaster which not only provided contingency site to a leading multinational in Pakistan for its 200 people but also provided other services as co-location for their 20 servers. Our client was up and running within 12 hours, and not only gave a positive signal to its clients outside Pakistan but also gave a direction to other companies in Pakistan about how to be safe and secure in volatile conditions of Pakistan.

We at Elate IT offer our services of Business Continuity to all companies in Pakistan.

We provide completely furnished and equipped IT Contingency (Backup offices) sites, Disaster Recovery Planning, Business Continuity Planning, Escrow Services and IT Infrastructure Consultancy.

Elate IT has multiple contingency sites situated in different areas of Karachi including I.I Chundrigar and Defence. Please do visit our website www.elateit.com for more details.

As said by many, it is better to be safe then sorry.
